But it turns out that Snapchat pics don't completely disappear from a device, and users can take a screenshot before an image vanishes in the app. And while recent studies revealed that "sexting" (sending sexual messages and images, usually via text message) is not as popular as parents had feared, "disappearing photo" apps like Snapchat might embolden kids to send more explicit photos and texts than they would have before through traditional texting. WhatsApp	Ages 4+ 4.5 Stars Ranked #23 in Overall Apps		Free messaging app that uses your internet connection to let you message and call friends and family.	While this app is free, many predators have been known to frequent this site, because teens are known to use this app for sexting. http://www.modernmom.com/7-surprisingly-dangerous-social-media-sites-for-teens-112176.html
Twitter	Ages 4+ 4 Stars Ranked #29 in Overall Apps		Twitter is a service for friends, family, and coworkers to communicate and stay connected through the exchange of quick, frequent messages. People post Tweets, which may contain photos, videos, links and up to 140 characters of text.	Twitter is notorious for its inability to stop pornography, which comes through the posts of various user accounts. Also, it's another avenue for strangers to connect with kids and teens, if they are not careful. http://www.kidmintools.com/2015/12/12/10-dangerous-apps-for-kids-and-teens/
Kik	Ages 12+ because of: - Mature/Suggestive Themes - Infrequent/Mild Nudity and Sexual Content 3.5 Stars Ranked #40 in Overall Apps		Chat on kik. Kik lets users connect with friends, groups and the world around them through chat.	The app is rated ages 17+, but there is no age verification so anyone can download it. Like some other instant messenger apps, Kik allows your teen to connect with others using just a username (rather than texting from her phone number). But it begs the question: Should teens be texting with people beyond their phone contacts? Reviews in the App Store and Google Play store reveal that many people use Kik to meet strangers for sexting. The app also been connected with cyberbullying. Rebecca Sedwick, the Florida bullying victim who killed herself, reportedly used Kik and Voxer in addition to ask.fm — receiving messages like "Go

Tinder	<p>Ages 17+ because of:</p> <ul style="list-style-type: none"> - Frequent/Intense Mature or Suggestive Themes - Infrequent/Mild Nudity and Sexual Content - Infrequent/Mild Profanity - Crude Humor <p>4 Stars</p> <p>Ranked #56 in Overall Apps</p>		<p>Tinder is a location-based dating and social discovery service application (using Facebook) that facilitates communication between mutually interested users, allowing matched users to chat.</p>	<p>“Tinder's developers describe the app as "the fun way to connect with new and interesting people around you." But it's mainly used as a dating tool or an anonymous hook-up locator by 20-somethings, college students, and even younger teens and tweens. The app is rated ages 17+ but Tinder's privacy policy allows teens as young as 13 to register (the app connects with Facebook — which is also technically for ages 13+ — to pull in photos for users' Tinder profiles). Tinder helps people find others in their geographic location and allows users to view eac others' photos and start instant messaging once both people have "liked" one another. The geo-location features and anonymous nature of the app put kids at risk for catfishing, sexual harassment, stalking, and worse.”</p> <p>http://fun.familyeducation.com/mobile-apps/social-networking/74548.html?page=3</p>

Dropbox	Ages 4+ 2.5 Stars Ranked #57 in Overall Apps		Dropbox is a home for all of a user's photos, docs, videos, and files. Anything added to Dropbox will automatically show up on all their computers, phones and even the Dropbox website — so they can access your stuff from anywhere.	Recent Dropbox hack showed the risks of storing unencrypted, sensitive information on cloud services http://www.networkcomputing.com/cloud/5-dropbox-security-warnings-businesses/862532134
Tumblr	Ages 17+ because of: <ul style="list-style-type: none"> - Unrestricted Web Access - Frequent/Intense Sexual Content and Nudity 4 Stars Ranked #90 in Overall Apps		Tumblr lets users effortlessly share anything. Post text, photos, quotes, links, music, and videos from their browser, phone, desktop, email or wherever they happen to be. It is a cross between a social networking site (like Facebook and Twitter) and a blog.	Many children and young teens are also active on this 17+ photo-sharing app. It can also be used for sharing videos and chatting. Common Sense Media says Tumblr is "too raunchy for tykes" because users can easily access pornographic, violent, and inappropriate content. Common Sense also notes that users need to jump through hoops to set up privacy settings — and until then, all of a user's photo and content is public for all to see. Mental health experts say that Tumblr can be damaging to adolescents' mental health because it tends to glorify self-harm and eating disorders. http://fun.familyeducation.com/mobile-apps/social-networking/74548.html?page=11

Ask anonymously or not. It's entertaining, easy to use, and you'll be surprised how much you learn about other people and even yourself.	This app allows users to interact in a question-and-answer format — with friends, peers, and anonymous users alike. The app is rated ages 13+ and is most popular in Europe but is catching on in the U.S. Some kids have used the app for hurtful cyberbullying that has been linked to suicides, including the death of 12-year-old Rebecca Sedwick of Florida. British schools have sent home letters calling for students to stop using ask.fm because of its use in several cyberbullying incidents there, and its loose regulation and lack of monitoring. In response to the uproar in the U.K., the site added a button where users can report abuse, but some parents feel it's too little, too late.
